

collabo

Ready. Set. **Collaborate.**

GET **EVERY** MEETING OFF TO A **FLYING START**

Collabo by Neets is a video conferencing soundhub that streamlines the way you start any kind of online meeting. Collabo is designed to fit the demands of the modern workplace and the diversity of videoconferencing solutions that exist on the market. With Collabo you just have to plug in the USB cable and it starts working right away – it is compatible with every kind of device and supports any kind of video conferencing software. (e.g. Skype, Slack, BlueJeans, appear.in etc.)

Collabo's audio system is made from high quality materials that improve

acoustics and contains technology that enhances voice quality. This, and a 2.0 full-range stereo with front-facing speakers helps ensure that online meetings and video conference calls have clear and coherent sound. Every time.

The webcam makes use of advanced technology to capture sharp video and audio in every environment, no matter the lighting conditions or noise in the background. With a wide 90 – degree field of view, 1080p HD resolution and 4x digital zoom, Collabo ensures that everyone in the meeting will be clearly

visible. Two noise cancelling, omni-directional mics capture sound from any direction and help you get your message across clearly.

Collabo by Neets is the device you need to unify your current video conferencing setup. By simplifying the way, you get an online meeting started, and providing you with excellent video and sound, Collabo helps you spend time on what really matters; having a productive meeting.
