VPL-HW45ES

Home Theater Projector

The Value-Packed Introduction to True Home Cinema

Expand your horizons beyond the TV screen - and create a spectacular cinematic experience in your own home. Available in a choice of black or white finishes to flatter any interior, the value-packed VPL-HW45ES Home Cinema projector lets you enjoy your favorite entertainment at its best in 2D or 3D.

Made for movie lovers, it's packed with technology developed for our professional Digital Cinema projectors, including SXRD panels and our own Advanced Reality Creation upscaling technology for fabulously detailed Full HD images. Generous 1,800 lumens brightness ensures that films and TV shows look clear and sharp, even in daylight living rooms.

Compact and easy to set up, the VPL-HW45ES fits neatly into any home theatre or living room, with quiet fan noise that won't disturb the show and a front-facing exhaust port for extra installation flexibility. The projector's long-lasting lamp is rated for an extra-generous 6,000 hours operation, for fewer interruptions and reduced maintenance costs.

Breathtaking Picture Quality

High Brightness

Drawing on optical technology developed for the VPL-VW1100ES, we've achieved high brightness. Conventional home theater projectors typically enhance the green color to secure image brightness. However, the projector boasts our new Bright Cinema and Bright TV modes. Optical block and signal processing improvements bring high brightness without a loss in color reproduction and contrast, so you can enjoy bright, crisp images even when viewing in a well-lit room.

Dynamic Image with High Contrast

Contrast enhancer

This function automatically adjusts the contrast for optimum viewing. It compensates for dark and bright parts of an image by analysing the signal component of each scene in real time to enhance contrast.

Advanced Reality Creation for Full HD

The Reality Creation function for our VPL-HW45ES projector has been further improved by taking the same technology from our 4K home theater models. It reproduces the texture and color of the original 1080p signal by restoring missing information lost during packaging original contents to disc and broadcast transmission. As a result, you can enjoy sharp and crisp Full HD pictures.

Advanced Motionflow

We've simplified our Motionflow offering. Combination mode uses Sony's Film Projection and Motion Enhancer capabilities, adding frames to reduce blur and maintain brightness in thrilling, fast-moving scenes. Cinema purists can choose True Cinema mode to retain the original 24 fps.

User-friendly Functions

Powerful Picture Calibration Features

There are eight calibrated presets to optimize various content.

Cinema Film1 Highly dynamic and clear images of typical master positive films		Cinema Film2 Rich tone and color typical of a movie theater		Reference Original image without any adjustment	
TV Watching TV programs, sports, concerts, etc.		Photo For still images taken with a digital camera		Game Well-modulated colors and fast response	
Bright Cinema Movies in a bright environment, such as a living room		Bright TV TV programs in a bright environment		User Adjusts the picture quality to suit your preference using Reference mode	

Professional Calibration

A correction tool allows you to adjust the hue, saturation, and brightness of each color and the color space for red, green and blue respectively, to get exactly the picture you want.

Industry-standard RF 3D Compatible

A built-in RF transmitter synchronizes with any RF 3D glasses for wider coverage and greater stability, and there's no need for an external transmitter.

Long-lasting Lamp

By incorporating a high-performance lamp and advanced lamp-control technology, the projector delivers an extremely long lamp replacement time of 6,000 hours*.

* Approximate recommended period, in low mode.

USB Updates

To get the best from your projector, there's a USB port for the latest firmware updates.

Low Latency Mode

A new feature for gamers. Experience our fastest ever response time between your controller and the screen for ultimate gaming action.

Installation Advantages

Electronic Panel Alignment

Ensures the red and blue elements in each pixel are precisely positioned against green. Adjustments can be made by as little as 0.1 pixels for optimum clarity.
