

6x6 4K HDR HDBaseT Matrix with 4 Mirrored HDMI Outputs and Audio Breakout

MXV-0606-H2A-70

Quickstart Guide

! WyreStorm recommends reading through this document in its entirety to become familiar with the product's features prior to starting the installation process.

! IMPORTANT! Installation Requirements

- Visit the product page to download the latest firmware, document version, additional documentation, and configuration tools.
- Read through the [Wiring and Connections](#) section for important wiring guidelines before creating or choosing premade cables.
- While this product supports CEC for the HDMI outputs, WyreStorm cannot guarantee compatibility with all forms of CEC communication.

In the Box

- 1x MXV-0606-H2A-70 Matrix
- 1x AC Power Cord with EU pins
- 1x AC Power Cord with US pins
- 1x AC Power Cord with UK pins
- 1x AC Power Cord with AU pins
- 1x IR Remote (CR2025 Battery not Included)
- 6x IR Emitters
- 6x IR Receivers
- 2x Matrix Mounting Brackets with screws
- 1x Quickstart Guide (this document)

Basic Wiring Diagram

Wiring and Connections

WyreStorm recommends that all wiring for the installation is run and terminated prior to making connections to the switcher. Read through this section in its entirety before running or terminating the wires to ensure proper operation and to avoid damaging equipment.

⚠ IMPORTANT! Wiring Guidelines

- The use of patch panels, wall plates, cable extenders, kinks in cables, and electrical or environmental interference will have an adverse effect on signal transmission which may limit performance. Steps should be taken to minimize or remove these factors completely during installation for best results.
- WyreStorm recommends the use of shielded category cable to minimize signal noise and interference.
- WyreStorm recommends using pre-terminated HDMI cables due to the complexity of these connector types. Using pre-terminated cables will ensure that these connections are accurate and will not interfere with the performance of the product.

Cat6 Cable Performance Guide

WyreStorm recommends the use of shielded cable to minimize signal noise and interference

IR TX/RX Guidelines

- Using WyreStorm infrared emitters and receivers is the best way to ensure that most IR coding formats are transmitted and received by the NetworkHD system. Other 3rd party emitters and receivers can be used; however, these devices must operate in the same manner as the WyreStorm devices.
- Due to differences in IR across 3rd party control systems their IR ports should never be connected directly to a NetworkHD system as an incompatibility may exist. WyreStorm offers a cable that compensates for voltage differences as well adjusts for differences in the pins used within the port. Refer to the [CAB-IR-LINK](#) product page for more information.

IR TX Port Pinout

Connection for IR TX (transmit) uses a 3.5mm (1/8in) mono plug.

IR RX/IR EXT Port Pinout

Connection for IR RX (receive) uses a 3.5mm (1/8in) stereo jack that outputs +5V DC to power the included IR receiver.

IR Code Settings

This matrix has 2 different IR code sets to help alleviate interference with devices that may contain a similar IR code. These various code sets can be set within the units web UI should the need arise to change them. We recommend that the IR code set be left to default unless absolutely required to resolve a code sharing issue.

- Access the Web UI. Refer to [Accessing the Web UI](#).
- Navigate to the Settings tab within the Admin section of the Web UI. Default password is admin.
- Under IR Code select one of the available IR code sets. Mode 1 (0x00) is the default setting.

RS-232 Wiring

Most control systems and computers are DTE where pin 2 is RX, this can vary from device to device. Refer to the documentation for the connected device for pin functionality to ensure that the correct connections can be made.

WyreStorm Connector		3rd Party Device
Pin 2	TX (Transmit) ---> To --->	RX (Receive)
Pin 3	RX (Receive) ---> To --->	TX (Transmit)
Pin 5	G (Ground) ---> To --->	G (Ground)

Note: Pins not shown in table have no connection.

Setup and Configuration

Setup for this matrix including EDID is performed within the Web UI. Refer to [Accessing the Web UI](#) for details.

Accessing the Web UI

This matrix uses an Auto IP method to generate the initial IP address based on the network connections. By default the IP address is set to DHCP and will pull the IP address from a connected DHCP server. Should the network not contain a DHCP server the IP address will be generated based on the units mac address. The above operation will occur unless the IP Address setting in the web UI is set to static.

1. Connect the matrix to the same network as a PC.
2. Using a 3rd party network scanner, scan the network for the IP address of the matrix.
3. Open a web browser and enter the IP Address of the matrix.
4. Enter the password for the matrix. Default Password: admin

IP Address Notes

- The IP address of the unit can be displayed by pressing and holding the **UP** and **Down** buttons on the front panel for 3 seconds. The IP address will be displayed on the front panel.
- The installer password and general password are the same by default. WyreStorm recommends changing the password for installer login to avoid any unwanted changes being made to the matrix configuration.

Low Power Mode (Standby)

This matrix contains a Low Power Mode that will place the unit into Standby using less power than normal operating mode. While in this mode the Front Panel display and LEDs will be Off and outputs will be powered down. Once a command is sent via the Front Panel buttons, IR remote/control system, or RS-232/IP control system the unit will wake from Standby and be fully operational. The unit can be placed back into standby via the Web UI or by sending an API command as described in the following sections.

Enabling Low Power Mode via Web UI

1. Access the Web UI. Refer to [Accessing the Web UI](#).
2. Navigate to the Settings tab within the Admin section of the Web UI. Default password is admin.
3. Under Low Power Mode, select On to enable.

Enabling via RS-232/IP

Refer to the products API document for information on Com port and IP addressing settings.

- To place the unit into Standby send the command STANDBY<CR><LF>.
- To remove the unit from Standby send the command WAKE<CR><LF>.
- To query the current Standby state send the command GET STANDBY<CR><LF>.

Troubleshooting

No or Poor Quality Picture (snow or noisy image)

- Verify that A/V mute is not enabled. Check Web UI for status on the selected output
- Verify that the matrix is not in Standby. Refer to Low Power Mode (Standby) for details
- Verify that power is being supplied to the transmitter and receiving device.
- Verify that all HDMI and HDBaseT connections are not loose and are functioning properly
- Verify that the HDBaseT cable is properly terminated following EIA568B standard
- Verify that the output resolution of the source and display is supported by this matrix and receiver
- If transmitting 3D or 4K, verify that the HDMI cables used are 3D or 4K rated

No or Intermittent 3rd party Device Control

- Verify that the IR and RS-232 cables are properly terminated following the [Wiring and Connections](#) section.
- Change the matrix IR code set in order to avoid interference with other devices. Refer to [IR Code Settings](#).

Troubleshooting Tips:

- WyreStorm recommends using a cable tester or connecting the cable to other devices to verify functionality.

Specifications

Audio and Video																																					
Inputs	6x HDMI In: 19-pin type A																																				
Outputs	6x HDBT Out: 8-pin RJ-45 Female 6x S/PDIF Out: TOSLINK (Digital Optical) 4x HDMI Out: 19-pin type A																																				
Output Video Encoding	HDBaseT Class A																																				
Encoding Data Rate	9.2Gbps																																				
End to End Latency (Max)	10µs (micro seconds)																																				
Audio Formats	S/PDIF: 2ch LPCM Dolby Digital and DTS up to 5.1ch HDMI: 2ch LPCM Multichannel up to Dolby Atmos and DTS-X

Note: WyreStorm recommends the use of shielded category cable to minimize signal noise and interference																																					
Supported Standards	DCI RGB HDR HDR10 Dolby Vision up to 30Hz HLG BT.2020 BT.2100																																				
Maximum Pixel Clock	HDMI: 600MHz HDBaseT: 297MHz																																				
Communication and Control																																					
HDMI	HDMI 2.0 HDCP 2.2 EDID CEC Input supports DVI/D and DisplayPort Dual-Mode (DP++) v1.3 with adapter (not included)																																				
HDBaseT	HDMI 2.0 HDCP 2.2 EDID CEC 1-way PoH Bidirectional IR																																				
CEC	CEC power triggering via API Requires CEC compatibility																																				
IR	6x IR RX: 3.5mm (1/8in) TRS Stereo 6x IR TX: 3.5mm (1/8in) TS Mono																																				
RS-232	1x RS-232: 9-pin DB9 Female Matrix Control Telnet commands supported																																				
Ethernet	1x LAN: 8-pin RJ-45 Female Web UI Matrix Control																																				
Power																																					
Power Supply	100~240V AC 50/60Hz																																				
Max Power Consumption	137W																																				
Environmental																																					
Operating Temperature	0 to + 45°C (32 to + 113 °F), 10% to 90%, non-condensing																																				
Storage Temperature	-20 to +70°C (-4 to + 158 °F), 10% to 90%, non-condensing																																				
Maximum BTU	467.5 BTU/hr																																				
Dimensions and Weight																																					
Rack Units/Wall Box	1U																																				
Height	43.5mm/1.72in																																				
Width	440mm/17.33in																																				
Depth	330mm/13in																																				
Weight	4.95kg/10.89lbs																																				
Regulatory																																					
Safety and Emission	CE FCC RoHS RCM
